Over the past few months we have received countless questions about our invention; Ringless Voicemail Drops. As usual, we received a lot of compliant related questions which are always great (compliance is always #1), we've also received many other types of questions, so we wanted to take a few minutes and start addressing some of these in an RVM FAQ.

We did this so anyone else that is curious about our amazing Ringless Voicemail Drop technology, but might be too shy to ask, can now also benefit from them. For those who are curious, but are too shy to ask questions regarding our amazing Ringless Voicemail Drop technology can also benefit from these questions.

Take a peek below at some of the topics we cover:

We hope you find this FAQ helpful. We have some of the most knowledgeable and talented team members when it comes to Ringless Voicemail Drops. Please do not hesitate and feel free to email or call us anytime! We are open 7 days a week from 9 a.m. to 11 p.m, Eastern Time. We are always happy to help.

What is a Ringless Voicemail Drop?

A Ringless Voicemail Drop is a server to server communication method allowing a direct insertion of a voicemail message into a voicemail box or voicemail server. This technology was originally invented by Stratics Networks over 10 years ago. Stratics Networks is the firm that named the technology and coined the phrase “Ringless Voicemail Drops”. To this day, Stratics Networks still owns RinglessVoicemailDrops.com and every similar domain name in existence. Ringless Voicemail Drops (RVM) allow a custom voicemail message to be inserted directly into a recipient’s voicemail without contacting the subscriber directly. Recently, Stratics Networks, with the help of carriers and telecom wizards in 3 countries, readapted RVM to work with landlines and have introduced Ringless Voicemails Drops – Landlines. This currently has a compatibility of over 300 million landline telephones complementing an over 80% compatibility of all mobile lines in North America. For more information about Ringless Voicemail Drops, [click here – Ringless Voicemail Drops](#).

How do Ringless Voicemail Drops work?

Ringless Voicemail Drops work by allowing a server to insert a voicemail message directly into the carrier’s voicemail server making Ringless Voicemail Drops a non-intrusive form of messaging. Stratics Networks creates a landline to landline session that drops the Ringless Voicemail directly onto the backend of the phone system (carrier’s voicemail infrastructure), so no traditional call is ever made. Our self-serve platform makes it easier than ever to track successful drops, scrub against the National Do Not Call (NDNC) list and download full, detailed reports.

Is a call ever made with Ringless Voicemail Drops?

Ringless Voicemail Drops do not place a traditional telephone call but rather insert a voicemail directly into a voicemail server, bypassing the subscriber. Since no traditional call is ever made, the subscriber is NEVER billed for the contact. Stratics Networks’ proprietary Ringless Voicemail Drop software creates a landline to landline session that drops the voicemail message directly to the telephone company’s voicemail server.

How much do Ringless Voicemail Drops cost?

Ringless Voicemail Drops cost can range from a couple pennies to as high as 10 or even 20 cents. Stratics Networks offers volume-based pricing. Essentially, this means the more drops you buy, the less you will be paying per Ringless Voicemail Drop. With Stratics Networks, you only pay for successful drops! Remember, it’s only a deal if it works properly. Stratics Networks is the only Ringless Voicemail provider that actually **records** all voicemail insertions allowing our clients proof that each message is inserted successfully.

Why use Stratics Networks’ Ringless Voicemail Drops?

- A non-intrusive form of messaging where the recipient can listen to the message at their convenience.
- Can reach thousands of people in a matter of minutes.
- Can increase your response rate by 80%.
- Have a built-in National Do Not Call list.
- Include an extensive list of amazing features.
- Is available for both mobile and landlines.

How can I get started with Ringless Voicemail Drops?

Getting started with Ringless Voicemail Drops is as easy as creating an account. From there you can choose how many drops you want to utilize. We even have a Test Drive account that allows you 1000 drops to try out and get your feet wet! To sign up for an account, [click here](#).

Are Ringless Voicemails exempt from all the FCC rules?

Are Ringless Voicemail Drops exempt from all TCPA rules?

No, they are not. Stratics Networks takes the approach that Ringless Voicemail Drops must be used responsibly at ALL times. Although, voicemail technology is not regulated by TCPA in the same way as a robocall, there are ALWAYS rules that must be followed when using RVM. The TCPA also has several rules in place governing the content of voicemail messages.

Can Ringless Voicemail Drops protect you from lawsuits?

No, people can sue you for anything. It is very important to use Ringless Voicemail Drops responsibly at ALL times. This includes, but is not limited to, scrubbing messages against the NDNC list, providing an opportunity for people to opt-out of future messages and always clearly identifying yourself when leaving a voicemail.

Do Ringless Voicemail Drops have any rules associated with them?

Yes, it is very important to use Ringless Voicemail Drops responsibly at ALL times. This includes, but is not limited to, scrubbing messages against the NDNC list, providing a opportunity for people to opt-out of future messages and always clearly identifying yourself when leaving a voicemail.

Are ringless voicemail drops the “Wild West” of telephone communications?

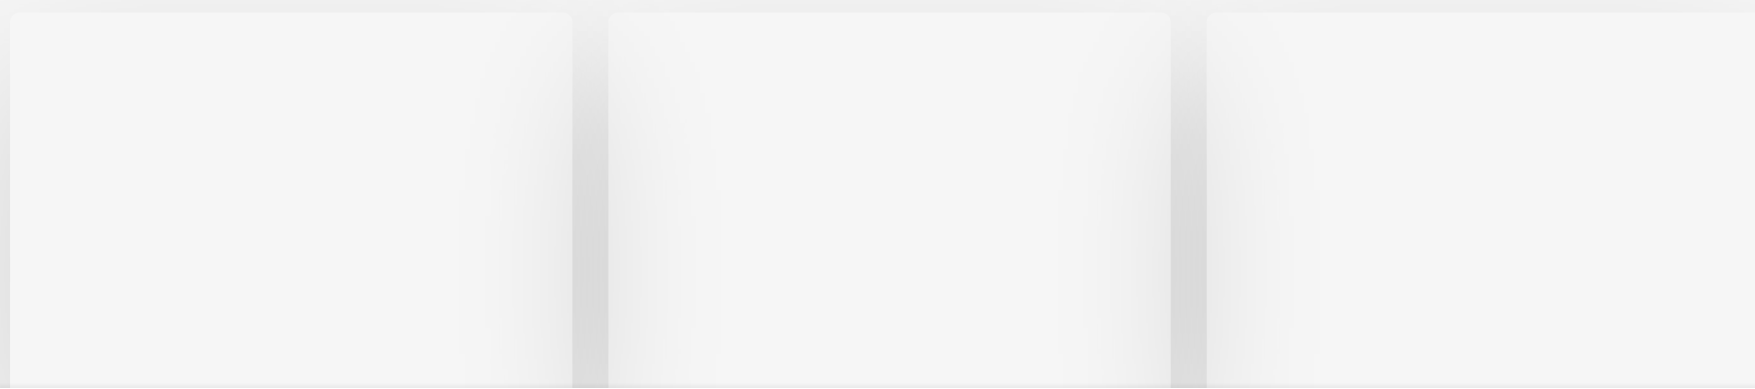

No, it is very important to use Ringless Voicemail Drops responsibly at ALL times. This includes, but is not limited to, scrubbing messages against the NDNC list, providing a opportunity for people to opt-out of future messages and always clearly identifying yourself when leaving a voicemail. Stratics Networks has a ZERO spam policy in effect and will not tolerate misuse of our services.

Are Ringless Voicemail Drops Effective?

Yes, Ringless Voicemail messaging is extremely effective and when used responsibly is a non-intrusive responsible alternative to other forms of messaging.
